RE: PROPOSED MINING SEQUENCE MODIFICATION TO LITTLE EMMA VEIN,  
TOM TAYLOR MINE, GILSONITE LEASE U-0122694

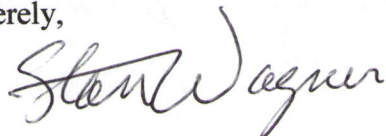

Dear Mr. Kohler,

Ziegler Chemical & Mineral Corp. proposes to leave two blocks of ore between the 70 to 375 foot levels on the east side of the Tom Taylor #3 mine shaft. (See attached maps)

Due to the grade of ore, the block situated closest to the shaft will be mined on an "as needed" basis.

The second block of ore shown on the accompanying maps will be left to help support the mine. ZECO personnel will mine this second block of ore after the remainder of the mine is depleted. This will be the last block of ore removed from the Tom Taylor #3 mine.

Sincerely,

Stan Wagner

SJW
